

Stem cells and Molecular Medicine

Isabella SAGGIO / Domenico FLAGIELLO

Effectives: 15

Language: English

Where?

Rome

When?

December 12-16 / 2022

Evaluation:

Analysis of a scientific article

Questions:

dome fla@gmail.com

Number ECTS : 4

Total numbers of hours
: 30h

Teaching format :

Lectures and poster
presentation

Teaching objectives

The course consist in a series of seminars dealing with the most updated and innovative cellular and molecular biology issues in the field of stem cells, cancer and aging.

The seminars are held by international scientists with high experience in each specific topic.

Teaching outline

The course is organized in a series of one hour seminars followed by an open discussion between speakers and students. This course allows students to integrate basic knowledge of cell biology with the most up-to-date information and techniques of the sector with particular attention to translational and biomedical aspects.
