

Genetic predisposition to cancer

Lisa Golmard & Eric Pasmant

Effectives: 20

Language: English

Prerequisites: notions about gene alterations

Where?

Institut Curie, Paris

When?

November

Evaluation:

Oral article presentation

Questions:

lisa.golmard@curie.fr

Number ECTS:

Total number of hours:

30

Teaching format:

Conferences

Teaching objectives

Understanding clinical & biological aspects of cancer genetic predisposition

Teaching outline

- **Class: Monday to Thursday morning**

. General concepts (cellular pathways, genomic imprinting in tumors, cancer genetic epidemiology)

. Conferences on cancer predisposition syndromes: breast & ovarian cancers, colorectal cancers, renal cell carcinoma, paraganglioma/pheochromocytoma, *TP53* & Li-Fraumeni syndrome, melanoma, retinoblastoma, neuroblastoma, *DICER1* syndrome, RAS/MAPK syndromes & leukemia
